

Kofax Software

Intelligent Capture & Exchange products from Kofax work directly with your existing business applications and IT platforms to automate the **capture and exchange of documents and information**. Our solutions, products and technologies improve the speed, cost, accuracy and efficiency of your business processes and transactions by enabling your organization to exchange information automatically with anyone, anywhere, in any format.

Back Office Capture & Exchange

Back-office capture and exchange automates business processes by **capturing and transforming documents** into a digital format, delivering them into applications and archives, and **exchanging information** among a wide variety of applications and devices.

Kofax Capture

Kofax Capture, formerly Ascent Capture, accelerates business processes by collecting documents and forms, transforming them into accurate, retrievable information, and delivering it all into your business applications and databases.

Kofax Express

Kofax Express makes it easy for anyone to scan, organize and store documents, at speeds that make short work of batches big and small. Easy enough for beginners, powerful enough for pros; let Kofax show you the new Express route to scanning.

Front Office Capture & Exchange

Front-office document capture enables your organization to improve business performance -- from **scanning documents** at the point of entry into a workflow to document-driven **business process automation** solutions that decrease the cost, time, and effort required to handle documents.

Kofax Document Exchange Server

Document Exchange Server is a document-driven business process automation solution that decreases the cost, time, and effort required to handle documents. [More...](#)

Kofax Document Scan Server

Kofax Document Scan Server (DSS) enables organizations to improve business performance by scanning documents at the point of entry into a workflow. [More...](#)

Image Optimization

VirtualReScan (VRS)

VirtualReScan (VRS) is the *de facto* standard for **improving scanning productivity**, reducing document preparation and **producing perfect scans** the first time, every time. [More...](#)

Adrenaline

Adrenaline is a complete family of **scanner controllers**, **image processing accelerators**, and **software engines** designed to offer the best support possible for professional document scanning. [More...](#)
