

Kofax Solutions

Every organization has its own specific business processes and industry regulations. That is why Intelligent Capture & Exchange solutions from Kofax adapt to the unique needs of each organization to **streamline and accelerate its document-driven business processes**: from claims processing for an insurance company, to proof-of-delivery for a logistics firm, to new account opening for a bank, to case management for a government agency, to invoice processing for almost any organization.

Invoice Processing

Improve your bottom line profitability, reduce transaction-processing costs and accelerate financial settlement cycles for optimal payment terms with automated **procure-to-pay solutions**. Decrease the cost, time and effort required to capture and validate invoices in order to provide process ready data to the backend.

Banking & Finance

Millions of consumers entrust banks with their financial future. Thousands of businesses depend on them for financing. Hundreds of regulators and auditors monitor their every move. To compete and thrive in this environment, banks and financial institutions need solutions to securely **capture, exchange, and manage** an electronic paper trail for every transaction.

All Kofax Solutions

- Banking & Finance: Streamline and accelerate new account opening, customer service and loan processing.
- Invoice Processing: Reduce delays and errors in processing invoices, qualify for early payment discounts and improve vendor relations.
